

# Dmytro Prylutskyi

## Senior Mobile Developer

My name is Dmytro. Development is both my job and my hobby!

Even though I have management and business skills, I am a developer at heart. For me, creating a quality and interesting product is more important than holding a certain position at work.

### Location:

Germany, Munich

### Development:

### Skills:

The pursuit of excellence,  
using only advanced technology,  
and honesty

## Brief information

### Programming languages:

Dart, Kotlin, Golang, TypeScript, Java, PHP, JavaScript, CSS, HTML, VB.NET

### Frameworks:

Flutter, Android, Angular, Laravel

### Technologies and architectural solutions:

Clean Architecture, BloC, MVP, MVVM, MVC, cloud technology, artificial intelligence, Open Auth, Rest API, gRPC, Firebase, AWS

### Databases:

Hive, Firestore, PostgreSQL, MySQL, SQLite, MSSQL, MongoDB

### Functional features of the developed software:

Cryptocurrency, Bluetooth LE, GPS, camera, traffic exchange, maps, parsing, socket etc.

### Languages:

Russian, Ukrainian - native  
English - excellent technical, written and spoken  
Deutch - I'm in training right now

Age:	37	Education:	Medium technical
Citizenship:	Ukrainian	Development experience:	More than 20 years
Family status:	Married, without children	Staff management experience:	More than 10 years
Ready to move:	Discussable	Religion:	Jehovah's Witness

## Education / Work

### Education:

- 1994 - 2002 - Secondary school №129 with an environmental bias.
- 2002 - 2006 - Kharkiv Radio Technical School (HRTT). Specialization - radio engineer.
- 2006 - now - A huge number of various online courses, seminars, conferences, etc.

### Work experience:

- 2004 - 2006: Freelance Web Developer.
- 2006 - 2010: Prepress Engineer (Designer) at Nargus LLC. During this time, I developed an internal ERP system for the design department to streamline everyday tasks such as receiving emails, structuring files, and organizing placements.
- 2010 - 2011: Prepress Engineer (Designer) at Mikko Group.
- 2011 - 2015: Prepress Engineer and Technologist at Nargus LLC. I contributed to the development of a comprehensive server/client desktop ERP application for staff management, process technology, workflow, and more.
- 2011 - 2015: Freelance Android Developer.
- 2015 - 2017: Co-founder and CEO of Syject Company. I was responsible for staff management, client communications, and financial oversight. As the tech lead, I was directly involved in the development of all company projects for both web and mobile platforms.
- 2017 - 2018: Freelance Developer specializing in mobile, web, and backend development.
- 2018 - 2023: Founder and CEO of DipDev Studio, my personal company that provides mobile solutions development services for businesses. I manage my own team and am also actively involved in development.
- 2024 - present: Freelancer as a "DIP Dev".

## Experience

### Software development (experience over 20 years - sorted in reverse order):

- Cross-Platform Development (Flutter) - 6 years
- Android development - 8 years
- Desktop development - 4 years
- Backend development - 2 year
- Web development - 4 years

### Personnel Management (experience over 10 years):

- Interviews, recruitment
- Financial issues, legal support
- Dismissal, reduction, mediation
- Distribution and control of tasks

Personal projects - **more than 30**

Personal commercial projects - **more than 20**

Participated in the development team projects - **more than 150**

# Last projects

## BZBGear Pro PTZ Camera Control

Product for precise camera control. Designed to accommodate different screen sizes and user control method (mouse, touching, drag and drop). Architecture requirements for scalability were taken into account. Supports dark and light design, adaptation to changing screen size, smooth operation of up to 50 video streams.

**Functional Features:** camera position control, camera fine-tuning, working with saved positions, tracking, video multiview system.

**Platforms:** Android, iOS, Mac, Windows, Linux.

**Stores:** Google Play, AppStore, Microsoft Store.

**Roles and Responsibilities:** head of developers. Developing project architecture, task management, implementing design, developing business logic, publishing to marketplaces, testing.

**Project Team:** 3 developers, 1 designer.

**Technologies and tools used:** Flutter, BloC, Hive, Rest API, shared\_preferences, intl, chopper, Clean Architecture, video streaming.

**Project Duration:** 8 month.

## BZBGear Switch Control

Software application designed to manage and control Matrix Switchers and AVoIP systems. It is designed to easily adapt to different screen sizes and control methods. The architectural design ensures reliable operation. The main feature is support for more than 20 different devices that have different APIs.

**Functional Features:** direct work with local network, connection control system, work with binary data, asynchronous execution of commands, timers, reconnect.

**Platforms:** Android, iOS, Mac, Windows, Linux.

**Stores:** Google Play, AppStore, Microsoft Store.

**Roles and Responsibilities:** main developers. Developing project architecture, task management, developing UI/UX design, developing business logic, publishing to marketplaces, testing.

**Project Team:** 1 developer.

**Technologies and tools used:** Flutter, BloC, Hive, SharedPreferences, Socket, Web Socket, Rest API, injectable, memory\_cache, built\_value, udp, lottie, animations.

**Project Duration:** 12 month.

# Previous projects

Some other projects I was involved in as a developer and can still be found on the internet.

**Social Media:** Find - Travelers

**Media and Content:** EVO8 Yoga, PupilHD, Solar Player, TVZ

**Communication and connections:** Protected Person Notes, KingVPN

**Miscellaneous:** BLX, Starbright SIS, Pawsome Pendants, Sverchok

## Senior mobile developer

---

### About myself

#### Personal qualities:

- Honesty is the most important quality.
- Purposefulness - I complete the tasks and goals to the end.
- Negotiation and persuasion experience.
- I find an approach to completely different people. I am able to settle conflicts.
- Business behavior and communication.
- Punctuality, scrupulousness and following the rules.

#### Hobby:

- I like to do something with my own hands
- Tourism

#### About myself as a developer:

I always stay updated with new technologies. Whenever a new technology emerges, I make it a point to study it and formulate my personal predictions about its potential success. I've rarely been wrong in my forecasts. I enjoy tackling architectural challenges for products. To enhance my skills, I frequently examine the internal implementation of code, and I occasionally contribute to public projects by making necessary changes.

#### Freely about myself:

Throughout my career, I have explored a wide range of technologies, programming languages, and approaches. I always strive to select the best options, but I ensure I achieve success in a particular area first so I can make informed comparisons.

I have extensive experience in communication, which enables me to manage personnel effectively and interact well with customers. I believe that modern education often provides less knowledge and benefit compared to independent study and dedication. I began my development journey as a hobby during my teenage years, ultimately founding my own company by learning from books, articles, and the experiences of others.

I was a co-founder of one IT company and am now the founder of a second. Although both companies are relatively small, I successfully built them from scratch without any external investment.

I have received no negative feedback from customers regarding my personal work, communication, or business management skills.

I consider myself a family-oriented and religious person, placing these areas of life as my top priorities. This perspective allows me to perform my job with quality and professionalism, as it gives me purpose and clear goals.

As a company director, I have conducted numerous interviews, made strategic decisions, and resolved conflicts. I have managed projects, taken on the role of Team Lead, and have successfully led various initiatives.

I value obtaining extensive knowledge in all areas related to my work. I possess practical experience in setting up servers, publishing applications across various markets and stores, launching and configuring advertising campaigns, and managing projects, time management and code writing using a wide range of tools and services.

While I do not consider myself a universal IT specialist, I am confident in my experience across multiple disciplines.

I am seeking a position in Mobile Application Development Management, Flutter Development Department Management, Technical Lead, General Developer, or similar roles.
